

Data Center Services

Worldwide Player - Organise Globally, Service Locally

Wisetek are now an established worldwide provider of secure used IT Asset management services to both major enterprise IT systems manufacturers and global Data Centers. Wisetek have operations in Europe, USA, Thailand and the Middle East to support our customers across these regions.

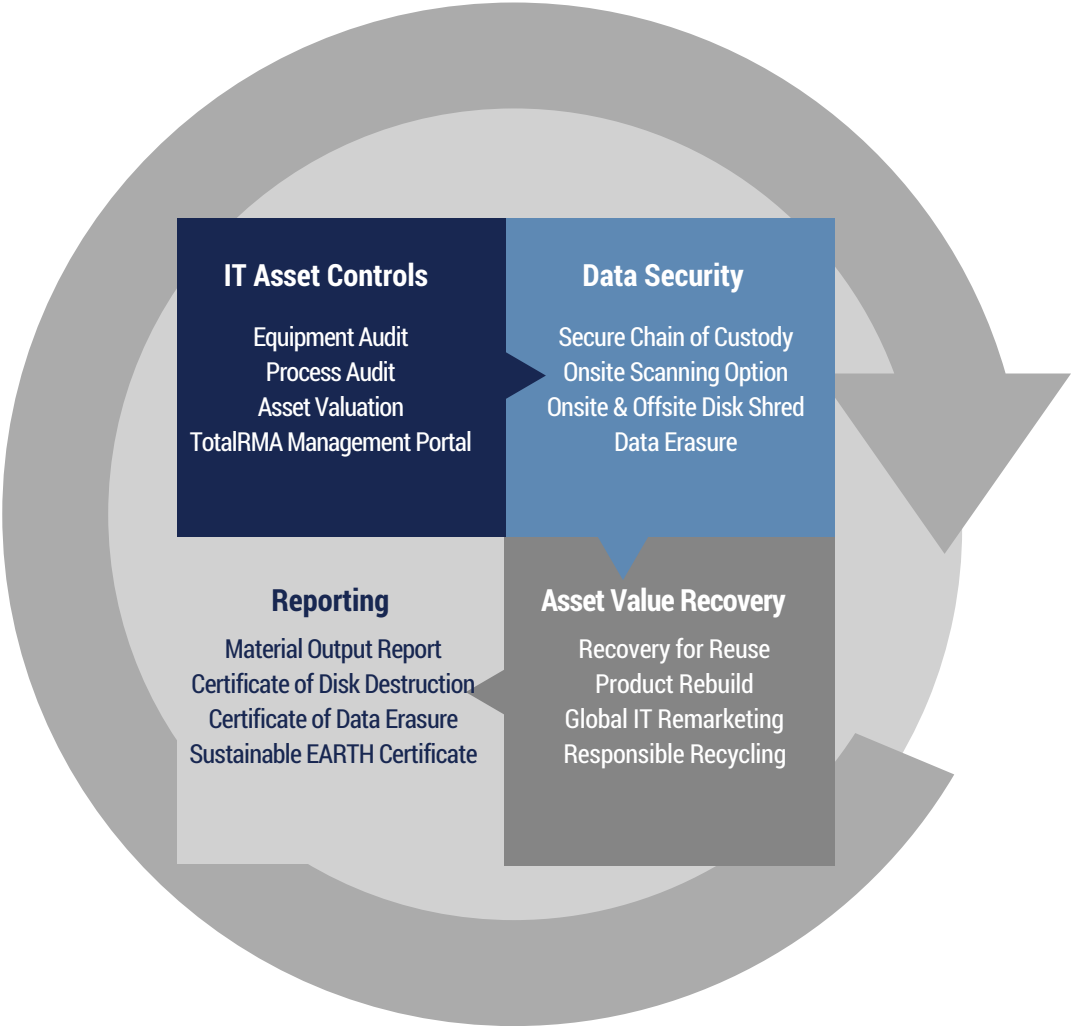

We Are Different

What sets Wisetek apart is our innovative ‘Recovery for Reuse’ process that leverages our unique pedigree gained from working closely with the world’s leading IT manufacturers to generate optimal financial recovery on their behalf, whilst ensuring their used materials are securely processed to the highest environmental standards.

Assurance

Wisetek provides IT security, financial and environmental assurance through our extensive ‘track and trace’ reporting. This includes data erasure or destruction of data carrying devices, the recording and processing of all material inflows and transparent reporting of subsequent economic outcomes and recycled material flows, as required

End to End Services

Our end to end service, governed by transparent chain of custody practices, ensures complete data security, maximum financial recovery and assurance that all material is processed to the highest environmental standards.

Leaders in the Circular Economy, Wisetek prioritize the recovery of material, either for reuse within our client's operations or for remarketing to our global network of buyers through Wisetekmarket.com. These reuse priorities assure our clients that they receive optimal financial returns from their IT assets.

Material no longer required is recycled to Wisetek's Sustainable EARTH standard, which is externally certified to the R2 Responsible Recycling standard and is compliant with all global regulations.

Data Security

Onsite & Offsite Data Destruction

Dedicated Mobile Shredding Trucks

ERP Scanning & CCTV Recording

Absolute Destruction of Drives

Complete Data Erasure

Data Erasure to Client Standards

Sustainable EARTH Certification Program

The Wisetek Sustainable EARTH Program is an assurance that all processing is fully transparent, secure, auditable and is compliant with the highest global environmental regulatory recycling standards.

We provide full chain of custody tracking and reporting of all end of life assets from our receipt to final disposition, ensuring every step in our data sanitization, re-use, recycling, and recovery processes is transparent and auditable and an outcome report is always provided
